

Upgrade to Get the Most From Your Monster

The first Muffin Monster® was introduced in 1973 followed by the Channel Monster® in 1994. JWC has been improving them ever since. Make sure you are getting everything you can from your Monster investment by upgrading to the latest JWC technologies.

- Wipes Ready™ Technology
- More Robust Design
- Simplified Maintenance
- Prevent Solids Loading in Drums
- Improved Solids Capture
- Lower Cost of Ownership

Channel Monster®

Enhanced Performance

- Wipes Ready™ Technology for today's sewage
- Perforated Drums prevent solids retention
- Up to 2-3 time higher flow capacities
- Multi-drive systems for better control
- Optimized Cut Control for improved cutter clean-out

Improved Durability and Reliability

- Hex drive shafts improve cutter and seal life
- Larger hex shafts for CSO applications
- Cast structural side rails
- Direct gear driving of drums
- Vertical shaft collar supports

Muffin Monster®

Uni-Body single piece housings with easy to exchange cutter cartridge

30001 to 30004T

Up to 66% higher flow capacity on open-channel units with Delta-P* Side Rails

30002 to 30005

Upgraded Performance & Improve Durability

- Wipes Ready™ Technology for today's sewage
- Optimized Cut Control for improved cutter clean-out
- Single piece mechanical seal cartridges
- 90 PSI seal ratings – a 50% improvement

WIPES READY™ UPGRADE

17 TOOTH WIPES READY™ CUTTERS*

- Serrated edges
- Knurled spacers
- Cuts in two directions

DELTA P* SIDE RAILS

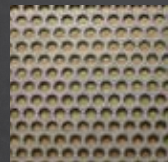

- Superior capture and directing solids into cutters
- Material hydraulically washed into cutters

1/2" PERFORATED DRUMS

- 59% better capture than coil drum
- Resists build-up of grease or other material

OPTIMIZED CUT CONTROL*

- Better cutter clean out
- Better cutting to small strips
