

**Dig a hole
and YOU'RE
DONE!**

Muffin Monster[®] Manhole

Description

The Muffin Monster Manhole (M3) makes it easier to install a grinder in sewage lines. This fiberglass reinforced polyester (FRP) manhole has the exclusive Muffin Monster grinder that shreds troublesome solids and eliminates costly pump breakdowns. This new Muffin Monster Manhole option makes for a quick installation. Simply dig a hole and lower the prefabricated manhole into position in gravity fed sewer lines.

The M3 is customizable based on site requirements. The manhole diameter is 4' (1200mm). The height, as well as pipe size and the type of top (traffic or hatch), are customizable.

Features & Benefits

Dual Shafted Muffin Monster Grinder

- Low-speed, high torque grinder handles rags, rocks, wood, clothing, plastics and other debris
- JWC exclusive immersible motor.

Manhole

- Fiberglass Reinforced Polyester- High- strength, water tight
- Manhole barrel thickness: ½" (12mm), diameter: 4' (1200mm)

Installation and Maintenance

- Factory installed guide frame/access ladder make it easy to access the grinder
- Only maintenance is semi-annual inspection

Applications

- Jails, Prisons, Hospitals, Sewage Lines, Nursing Homes, Colleges, Pump Stations, and many more.
