

IMPROVE MEAT WASTE PROCESSING

- RENDERING
- PROTEIN RECOVERY
- ANIMAL FEED
- PET FOOD

Whether you are rendering, recovering animal proteins or manufacturing pet food or animal feed, your processes can be made more efficient and effective with JWC products.

JWC grinders are powerful and can shred down to size fat, bone and hides. JWC | IPEC screens can effectively remove meat, oil and grease from fluid flows.

Improve the efficiency and effectiveness of your processes today!

GRIND DOWN ALL VARIETY OF FEEDSTOCK

Size Reduction Equipment

JWC Monster Industrial low speed dual shafted grinders have flexibility of customization for your exacting needs. Variety of cutting chamber sizes and specialized cutters work with or without spray water. Custom hoppers and stands are made to fit your exact application. A variety of motors are also available to ensure powerful cutting action and repeatable results.

REDUCE WATER USAGE AND MAXIMIZE SOLIDS RECOVERY

Wastewater Screening Equipment

In rendering, pet food and animal feed processes, there are multiple steps where meat, oil and grease need to be removed from process water. JWC | IPEC externally and internally fed drum screens and stationary side hill screens are commonly used for these needs. JWC will customize screen designs specific to these processes to keep screens cleaner with less water consumption, while increasing solids removal and maximizing throughput!
