

CERTIFICATION OF COMPLETION

PUMP PROTECTION OPTIONS IN THE BATTLE AGAINST WIPES

JWC experts discussed the ramifications of wipes on our sewage systems and how to combat those problems. Areas of discussion included:

- Wipes and their contribution to sewage clogs
- Evaluating equipment options
- Choosing the best cutters for your waste stream
- Dual-shafted grinding technologies for your environment
- Screening solutions for headworks protection

Date: Tuesday, January 12, 2021 11:00 am PT

Length: 1 hour (50 minute presentation and 10 minute Q&A)

Speakers: Stacy Belanger - Stacy Belanger is the Product Manager at JWC Environmental. She has more than 20 years of product management experience focused on mechanical products with the last 4 years spent in the wastewater industry. She has a B.S. in chemical engineering from the University of California, San Diego.

Troy Heimerl - Troy Heimerl is the Municipal Sales Director for JWC Environmental. Prior to JWC, he was at Electric Pump, the largest pump service organization in the upper Midwest. He has a Minnesota operator's license for Class D Water and Wastewater Treatment Plants and a degree in water/wastewater technology from Vermillion Community College.
