

MUFFIN MONSTER[®] MANHOLE

Dig A Hole and You're Done

Overview

The Muffin Monster Manhole (M3) makes it easier to install a grinder in sewage lines. This fiberglass reinforced polyester (FRP) manhole has the exclusive Muffin Monster grinder that shreds troublesome solids and eliminates costly pump breakdowns. The Muffin Monster Manhole makes for quick installation. Simply dig a hole and lower the prefabricated fiberglass manhole into position in gravity fed sewer lines.

The M3 is customizable based on site requirements. The manhole diameter is 4' (1200 mm). The height, pipe size, and the type of top cover (traffic or hatch) are customizable.

Features and Benefits

Dual-shafted Muffin Monster Grinder

- Low-speed, high-torque grinder handles rags, rocks, wood, clothing, plastics and other debris
- JWCE-exclusive immersible motor

Manhole

- Fiberglass reinforced polyester: high strength, watertight
- Manhole barrel thickness: 1/2" (12 mm)
- Manhole barrel diameter: 4' (1200 mm)

Installation and Maintenance

- Factory-installed guide frame and access ladder make it easy to access the grinder
- Minimal maintenance with semi-annual inspection

Applications

- Sewage lines, pump stations, jails, prisons, and many more
